

**DATE:** 12th of October

**TIME:** 18:00 to 20:00

**VENUE:** Spark Jones building, Ground floor, Room 11, The University of Huddersfield

*The IET's Professional Registration Advisor, David Hoyle, will give a talk on IET membership and Professional Registration. This event is aimed at undergraduate students, postgraduate (taught and research) students and staff in the School of Computing and Engineering, who are interested in applying for IET Chartership. The event is also a brilliant networking opportunity and a chance to find out more about the Hud-IET On Campus group.*

### ABOUT THE SPEAKER

David Hoyle is a Chartered Electrical Engineer with over 40 years' experience in the electricity distribution industry. He has contributed as an expert at national level in the fields of competition in connections, safety management, and embedded generation. He was Head of Connections for United Utilities in the North West of England and has also lectured at Newcastle University on Asset Management and Condition Monitoring. He is a member of the IET's Fellow Policy Panel Audit Committee.

## IET - ROUTES INTO REGISTRATION

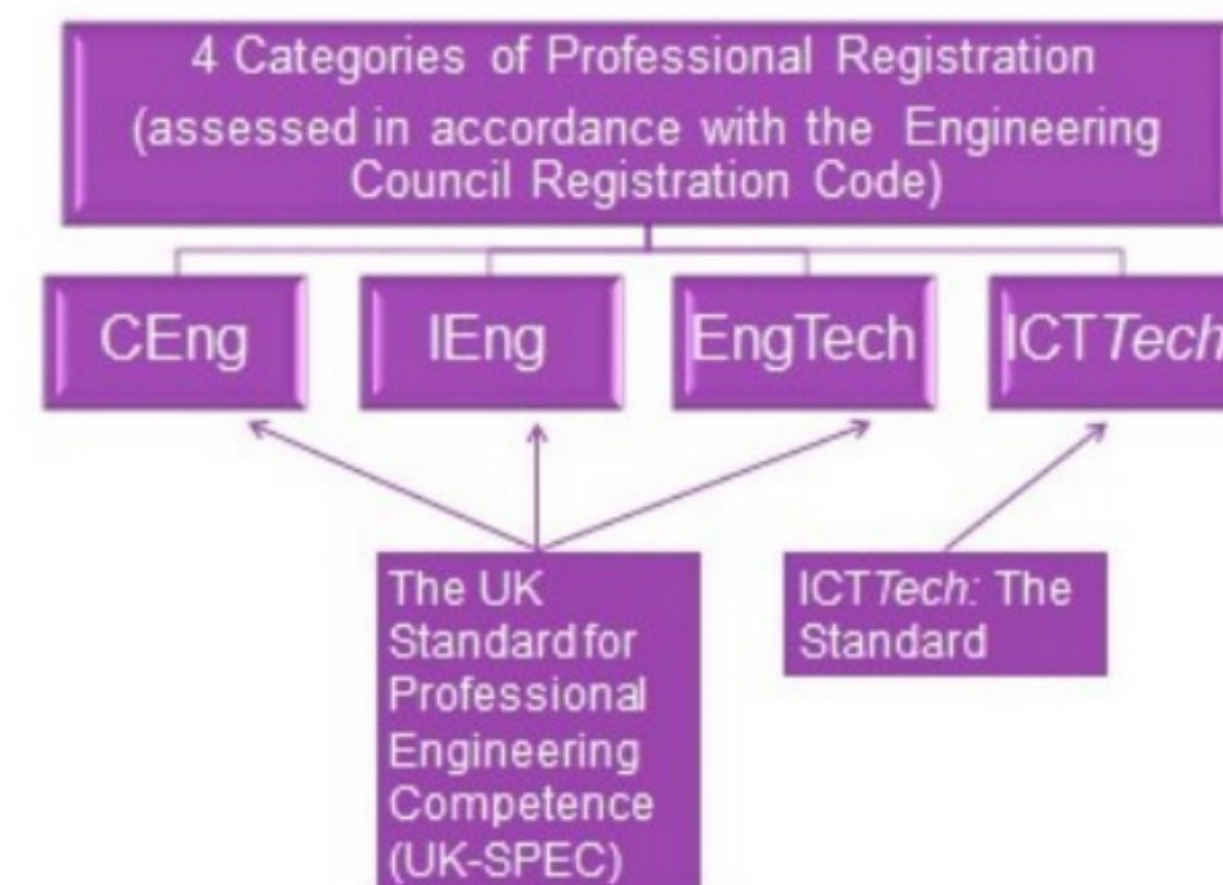

Professional registration is a key milestone for most engineers' careers. It is useful for engineers both in industry and academia. Professional registration allows you to demonstrate your

professionalism and gain recognition as a professional in your field.

It is never too early to start working towards professional registration. Many people have questions about what they need to do and how to start preparing. This event will help you get started.

The event will be an open discussion on what the IET professional registration process involves, with plenty of opportunities for you to ask questions. The discussion will start with a general overview of what the IET is and the benefits of membership. It then goes onto to talk about professional registration, what it means

and the different categories, before going on to discuss what the application process for professional registration with the IET involves.

For inquiries about this event or for more information regarding Hud-IET On Campus, please contact us at [Hud-IETOnCampus@hud.ac.uk](mailto:Hud-IETOnCampus@hud.ac.uk).
