Introduction

Validation of new courses and changes to existing courses are made in accordance with the University's [Regulations for Awards \(Taught Courses\)](#) and [Quality Assurance Procedures for Taught Courses](#).

This document provides course teams, and other colleagues involved with validation, procedures for, and information and guidance on, preparing courses and modules for validation. The Course Lifecycle team manages the validation process for the university.

Please note that nothing will be advertised until it has completed the validation cycle. This includes new courses, intakes, modes of attendance, award changes and course title changes. Completion of validation means confirmation of approval of conditions by the chair of the University Validation Panel (on behalf of University Teaching and Learning Committee (UTLC)), completion of any Competition and Markets Authority (CMA) approval processes and completion of any course setup activities.

Appendix 1 contains details of the **course** validation processes required for the specific type of change proposed, based on which part of the course specification the change relates to.

Appendix 2 contains details of the **module** validation processes required for the specific type of change proposed, based on which part of the module specification the change relates to.

The following flowchart (from Section B of the *QA Procedures*) presents an overview of the different types of validation event:

<https://www.hud.ac.uk/media/policydocuments/regulations/AppendixB-1.docx>

All course and module specifications are stored in the University's curriculum-management system, [CourseLoop](#).¹ This system is also used to manage the validation process and to hold documents and other evidence relating to validation. All course and module specifications are available students, applicants, staff and the wider public via the [Course and Module Catalogue](#). Course information is also held in the student information system (ASIS). Completion of ASIS updates is a key aspect of making the validation live.

¹ At the time of writing, course and module specifications for provision containing no academic credit (non-credit) is not directly held in CourseLoop.

Student recruitment timeline

For **new** provision, validation should be completed in time for inclusion in the printed University prospectus and to align with the recruitment cycle for the course type, in order to maximise recruitment. This may be up to 2½ years before the provision is delivered. Course information is also published online on [Course Finder](#) (this is populated from information in the IPP screen in ASIS):

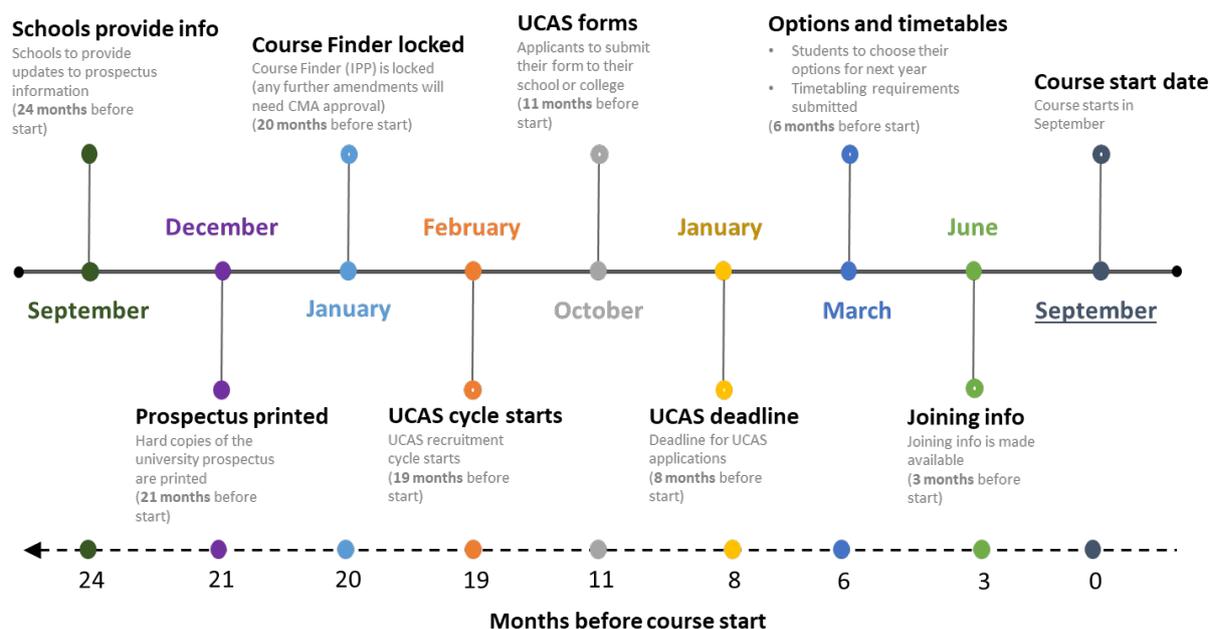

Undergraduate courses (September starts):

- The UCAS recruitment cycle starts in the February, around 19 months before the course is due to start, with applicants often submitting their choices to their school or college around October to meet the UCAS closing deadline in January
- The prospectus goes to print in December each year (21 months in advance of the expected intake), with Schools providing amendments and updates in the September before publication
- Joining information (which includes course information) is made available to September students in June (3 months before) (and for other intakes approximately 1 month before the expected start date)
- The normal turnaround time for a new course to be set up is 5 weeks following the approval of conditions

Postgraduate courses (September starts):

- Course Finder goes live at the same time as for undergraduate courses. The postgraduate prospectus goes to print in August of the year before the planned year of entry (13 months before the start date).
- The normal turnaround time for a new course to be set up is 5 weeks following the approval of conditions

The diagram below shows a timeline for course recruitment (September start):

For example, for a start date of September 2026:

<u>Action</u>	<u>Date</u>
School to provide prospectus info	September 2024
Prospectus print	December 2024
Course Finder locked	January 2025
UCAS cycle starts	February 2025
UCAS forms submitted	October 2025
UCAS deadline	January 2026
Students to submit options for next year	March 2026
School to submit timetabling requirements	March 2026
Joining info published	June 2026
Start date	September 2026

A calculator for determining recruitment timelines for different start dates is at [Course approval timeline calculator.xlsx](#).

If you do identify a new opportunity after the cut-off date for inclusion in the prospectus, then the course can be added to Course Finder, provided the course is validated **prior** to the first UCAS fair for the relevant recruitment cycle (March-June). You will need to provide, as part of your marketing statement, a reason for wanting to recruit outside of the normal recruitment cycle.

For **existing** provision, validation should be completed in time to align with the recruitment cycle above, and the following:

- Students choosing their optional modules choices (March)
- Timetabling requirements (Feb-March)
- Course setup processes (5 weeks once conditions are met)
- CMA approvals
- Any deadline dates for sign-off set by school and/or university committees

Competition and Markets Authority (CMA)

CMA requirements are based around the University's contract with the applicant and student. The contract information is the detail available on Course Finder, plus the information on the regulations, fees and other policies and procedures, which is sent to applicants when they receive an offer (the 'PDF' on the [MyContract](#) website), and which they will accept (together with any interim changes) on enrolment (in PDF via the MyContract website).

Further details on the CMA requirements can be found in the [CMA Guidance Document](#).

Note that CMA approval will be required to make any changes to information on Course Finder, once it has been locked (in January).

The course specification (and supporting documents), module specification(s), course handbook and module handbook are not part of the contract. These documents contain a statement in the document header to state that they are not part of the student contract.

All validations to **existing** provision must consider the following as a matter of course:

- the impact of the proposed changes on the information published in Course Finder
- the date on which the changes will be effective
- the rationale for that timescale
- the written agreement of all current students where the proposed changes would result in a change to the information published on Course Finder

Course Teams must contact current students to explain the proposed changes and confirm their agreement in writing to the change, in order for it to be applied, as part of the CMA process, irrespective of whether that change has been agreed by a validation panel.

The validation schedule

The Course Lifecycle team, which is part of Quality Assurance and Enhancement, maintains a university [Validation Schedule](#).

A downloadable report from CourseLoop is available at:

https://courseloop.hud.ac.uk/sys_report_template.do?jvar_report_id=94a1d1aac3f3ce503ce238ff05013163

This serves a number of purposes, including confirmation of the validation event type, the progress of validation events and confirmation of sign-off of conditions and recommendations. In addition, the schedule ensures that UTLC maintains oversight at an institutional level of both new course approvals and changes to existing courses (both within a single year and across a range of years).

The validation schedule contains the following detail relating to course validations:

- New courses
- Changes to delivery arrangements (e.g. mode of attendance (FT/PT), start date, new or additional intakes, delivery location, course duration)
- Changes to course title
- Changes to award type (e.g. BA to BSc, MSc to MA, etc.)
- Changes to overall course aims and/or learning outcomes
- Changes to course structure (e.g. addition or removal of placement year, removal and replacement of modules, changes to module credit ratings (merging/splitting), changes to pre-requisite modules (due to impact on progression), changes to progression criteria (particularly where more stringent than the University *Regulations for Awards*), etc.)
- Changes to delivery pattern or learning hours (e.g. which change how students engage with staff: introduction of evening/weekend or block teaching, changes to how learning hours are split, such as replacement of labs with lectures, etc.)
- Introduction of distance-learning mode of delivery

The validation schedule is the overarching university record of proposed and completed activities and does not change the nature of academic engagement and discussion of changes required at the designated validation type (e.g. Tier 1, Tier 2).

The Validation Schedule operates two years in advance of the proposed course start date, which is to support the recruitment cycle and enable courses to be included in the prospectus (published every December), around 18 months in advance of the start date. Schools provide information for the prospectus in September, with a November deadline.

For example, for courses with a 2026/27 start date, validation would normally be held in 2024/25. The Course Lifecycle team works closely with schools to ensure that course developments are planned with an appropriate lead time.

However, the University recognises the need to remain responsive and flexible, as far as possible, to the various opportunities and demands as they arise in relation to

course validation. Schools making proposals at a later stage should be mindful of the potential impact on the recruitment cycle and student numbers on the initial intake.

The Course Lifecycle team maintains a validation schedule in Planner, which is a working document for managing and organising validation events. The Planner is available at: <https://planner.cloud.microsoft/webui/plan/cOUB-BQ3C0KDIB5-KmL53JYAHuhl/view/board?tid=b52e9fda-0691-4585-bdfc-5ccae1ce1890>

Validation timelines, event assignment and reporting

An indicative timeline for the preparation of proposed items for validation and deadlines for changes to courses and modules is detailed below.

While the aim is to capture as much detail as possible in the snapshot of the validation schedule considered by UTLC, the Committee recognises that there will be late additions for a number of reasons and that the indicative timeline is not intended to restrict or inhibit these additions.

Where the School identifies additional items for the validation schedule, colleagues should contact the Course Lifecycle team with details of the proposed changes so that proposals can be set up, event types assigned, and additions made to the validation schedule.

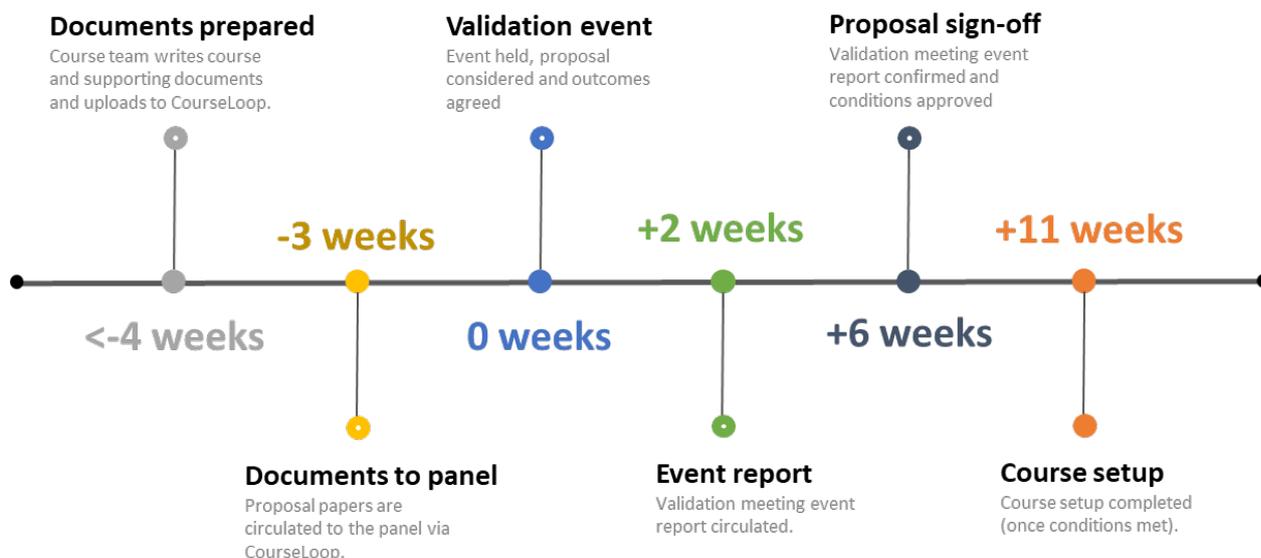

The validation process will conclude with the setting up of new courses (or changes to courses) on various university systems (e.g. ASIS) and colleagues should notify key stakeholders, such as Course Publications, Timetabling and Course Administration as early as possible in the process, so that they can manage their workloads.

Indicative timeline

The timeline for validation will depend on the type of event assigned (e.g. Tier 1, Tier 2, etc.) and whether it is a one- or a two-stage process. Further guidance (from Section B of the *QA Procedures*) is available at: <https://www.hud.ac.uk/media/policydocuments/regulations/APPENDIXCValidationandRecruitmenttimeline.docx>

Once an event type has been assigned, add the details to the [Current Validations List](#) (for all changes, including chair's actions) and the [Course Lifecycle Validation Schedule](#) Planner document (not for chair's actions or very minor changes). Ensure that the Course Publications team is tagged in the Planner so that colleagues are aware of activities that would need courses to be set up. Also ensure that a task is assigned in CourseLoop for Anna Powell, Senior Registry Officer (Curriculum Management), to check the proposal timeline in terms of the course setup requirements.

A simple timeline is as follows. From initial consideration to sign-off by a panel chair is normally a minimum of 15 weeks:

Validation event assignment and process

The Course Lifecycle team will assign a validation event type, based on the information provided in the Outline Proposal in CourseLoop.

As a general rule, the following will normally apply (but specific circumstances may mean a different level of event is assigned):

Type of development	Event type
New course in a new curriculum area	Tier 1 and Tier 2
New course in an existing curriculum area	Tier 1 and Tier 2 (or Tier 2 Fast-track)
New course derived wholly derived from existing modules	Tier 2 Fast-track or Tier 1 Enhanced
New short course	Tier 1 Enhanced
New non-credit course	Tier 1 Enhanced (or Tier 1)
Structural changes to existing courses	Tier 1 (\leq one-third) or Tier 2 Fast-track (\geq one-third) (or Tier 1 and Tier 2 if particularly complex)
Other minor course changes	Tier 1 (or chair's action)
Changes to module offerings	Tier 1 (or Tier 1 Enhanced)
Other minor module changes	Tier 1 (or chair's action)

The following process will apply:

Reporting outcomes of validation

UTLC has delegated authority to the chair of the University Validation Panel for approval of the proposal, based on confirmation that all conditions and requirements have been met in full. Once the chair has signed off the proposal, all relevant parties will be notified that the proposal is approved and validation is complete.

All finalised validations recorded on the validation schedule will be noted by UTLC and confirmed validation reports, together with confirmation that conditions have been met, will be received by UTLC. Any changes that involve student consent will be managed through the CMA process.

Changes to staffing

Course teams change from time to time, either through planned or unplanned activities, and schools need to have appropriate mechanisms in place to manage these staff changes to ensure there is no adverse effect on the student experience, including relevant communication and support plans for students.

Appendix 1 - Changes to course specifications

This appendix shows the method of validation normally required for changes to individual sections within the course specification stored on CourseLoop. The validation requirement relates to a change to that single section only. If changes are proposed to multiple sections of the course specification, all of the proposed changes should be notified to the Course Lifecycle team via the Outline Proposal in CourseLoop, so that all proposed changes can be considered together, for setting an appropriate event level and adding to the validation schedule. This may result in a higher Tier of validation than for a single change only.

In all cases, colleagues should be mindful that changes may affect the information included in the prospectus and Course Finder and therefore may be additionally subject to CMA approval, once validation conditions have been met and the appropriate approvals confirmed. Some changes may also require the Course Publications team to make changes to the course record in ASIS. The Course Publications team should be notified as soon as possible of any activities involving course setup (see Indicative timeline above).

Please note that the editorial function can be used within CourseLoop to correct errors in data input or if there is data missing. Editorial changes must not be used for making changes to courses in the categories below, except where explicitly stated.

Section	Type of change	Normally validated by	Notes	CMA notes
Item code	Do not change this section	N/A	N/A	N/A

Appendix 2 - Changes to module specifications

This appendix shows the method of validation normally required for changes to individual sections within the module specification stored on CourseLoop. The validation requirement relates to a change to that single section only. If changes are proposed to multiple sections of the module specification, all of the proposed changes should be notified to the Course Lifecycle team via the Outline Proposal in CourseLoop, so that all proposed changes can be considered together, for setting an appropriate event level and adding to the validation schedule. This may result in a higher Tier of validation than for a single change only.

In all cases, colleagues should be mindful that changes may affect the information included in the prospectus and Course Finder and therefore may be additionally subject to CMA approval, once validation conditions have been met and the appropriate approvals confirmed.

For any changes to modules (i.e. creation of a new version in CourseLoop), the course structure and the student study planner in the course specification of any courses containing that module must be updated to include the new version. The “Related Items” section of the module specification will show the courses that module is part of the structure of. Course appendices (e.g. PSRB mapping or assessment schedule) may also need to be updated and uploaded to the proposal’s Attachments area.

Please note that the editorial function can be used within CourseLoop to correct errors in data input or if there is data missing. Editorial changes must not be used for making changes to courses in the categories below, except where explicitly stated.

Section	Type of change	Normally validated by	Notes	CMA notes
Module code	Do not change this section		<ul style="list-style-type: none">• A new module will need to be created and the old module retained• Course structure and study planner updated• See Appendix 1 above and sections on the course structure
