

# AV

Each room has a high quality projector and sound system installed which can take inputs from our built in PC or you can bring your own device to connect to our systems. Both hand held and/or lapel mics are available in most rooms.

In addition to this we can provide a wide variety of AV equipment to help you to make your event more interactive or visually impressive.

Catchbox—our throwable microphone. Encourage your guests to get more involved and add a bit of fun to your event.

Uplighting—add atmosphere to your event with customised colours.

Webcasting—allows people who are unable to attend to watch your event online.

Light and music—to welcome your guests to the event.

There's plenty more so please ask [cls.avsupport@hud.ac.uk](mailto:cls.avsupport@hud.ac.uk) to see what we can do for you.
