Recruitment Pack

Health Innovation Manager
3M Buckley Innovation Centre (3M BIC)
Background

Opened in 2013, the 3M Buckley Innovation Centre (3M BIC) is a subsidiary of the University of Huddersfield.

The Centre’s remit is to provide support to regional businesses for innovation and growth and to work closely with the University of Huddersfield to help businesses explore advances in technologies which could lead to new and improved products.

The University has ambitious plans to open a new National Health Innovation Campus (NHIC) in September 2024. One of the first buildings on campus will house a new Health and Wellbeing Innovation Centre, due to open in 2025.

The 3M BIC will set up and operate the new centre and has secured funding to develop a strong pipeline of health innovation activity with businesses from October 2023 onwards. The 3M BIC’s Technology Team will lead the development of a dedicated Health Innovation Maker Space for the new centre and will host an interim health innovation space within the existing building until the new centre opens.

This is an exciting opportunity for a Health Innovation Manager to create, equip and run the new Health Maker Space; to demonstrate a range of health innovation technologies to regional businesses interested in tech adoption and to support businesses with innovation projects.

You will have the benefit of a range of additive manufacturing, testing and AV facilities, as well as access to the University’s academic researchers.

The Role

Job Purpose:

To work closely with the several partners, including the University of Huddersfield, Health Innovation Yorkshire & Humber (formerly YH AHSN), Mid Yorkshire NHS Teaching Trust and other stakeholders to set up and develop a health innovation maker space and deliver a portfolio of technology adoption projects that will support the health and wellbeing sectors and drive innovation in health and care.

The role will enable the creation of new or scale-up enterprises through the adoption of technology and collaborative R&D with academic researchers, helping to create a vibrant health and wellbeing cluster based around the National Health Innovation Campus.
Main Duties and Responsibilities:

Key Responsibilities:

1. Set up and manage the Health Innovation Maker Space (HIMS) within the new Health & Wellbeing Innovation Centre, including commissioning of equipment, software, and associated consumables, beginning with the interim Health Innovation Maker Space in 3M BIC.

2. Work with entrepreneurs and business clients on the application of health innovation technologies including:
   a. visualisation systems such as augmented (AR) and virtual reality (VR),
   b. data analytics in the health and medical environments to develop and present proof of concept ideas,
   c. electronics, software, and AI applications,
   d. additive manufacturing for health applications.

3. Work closely with colleagues and stakeholders to ensure that workstream projects are delivered to the agreed specification in the project plan, on time and within budget.

4. Undertake training and applied practice in the equipment and technologies in use, and design demonstrations/workshops to share that knowledge and expertise with client organisations and through guided tours of the centre.

5. Manage the operational aspects of the HIMS including access control, safe and effective use of specialist equipment by members, businesses, and affiliate staff members, alongside the events assistant. Supervise the operation, routine maintenance and safe use of the technologies housed in the HIMS and in the Health & Wellbeing Innovation Centre.

6. Work alongside business engagement colleagues on ascertaining business needs in relation to health innovation and design proposals utilising HIMS and wider University facilities and expertise that will fulfil them, or signpost to other expertise as appropriate.

7. Be able to present proposals or findings professionally to stakeholders, in written, verbal, or visual/interaction form, as appropriate, discussing any issues and seeking resolutions where possible.

8. Represent the Health and Wellbeing Innovation Centre at conferences and external meetings as required, including networking events to engage new prospective members and clients/businesses.

9. Manage the procurement of goods/material and resources in a timely manner and subsequently monitor budgetary requirements.

10. Manage all aspects of the HIMS including reporting for external stakeholders, tracking outputs, and liaising with partners.

11. Act as the management lead for the Health and Wellbeing Innovation Centre, within the 3M BIC management team, including co-ordination of broader activities and staff engagement in delivery of centre activities.

12. Work within the centre’s policies including those for health & safety, data protection and IT usage; provide help and advice to colleagues, clients, and stakeholders.

Please note that specific duties will vary from time to time: the above list is intended to indicate the general nature of the post and is not exhaustive, there is an understanding that any other reasonable duty pertinent to the grade of the post might be requested at any time [includes working occasional evenings when required].
# The Person

The successful candidate will be able to demonstrate the following attributes:

<table>
<thead>
<tr>
<th>Attributes</th>
<th>Essential</th>
<th>Desirable</th>
<th>Evidenced by</th>
</tr>
</thead>
